Lorna Ramsey			

<b>Topic/Subject</b>	<b>Discussion</b>	<b>Recommendations, Action/Follow-up; Responsible Person</b>
<b>1. WELCOME</b>	George Lindbeck, M.D. called the meeting to order at 12:30 A.M.	
<b>2. INTRODUCTIONS</b>	All of the attendees were asked to please introduce themselves.	
<b>3. APPROVAL OF MINUTES</b>	None prior	
<b>4. NEW BUSINESS</b>		
<b>General Discussion</b>	<p>It was noted that there was a weakness in the didactic material in the Special Considerations area: neonatology, pediatrics, geriatrics, etc. that may need enhancing.</p> <p>Intermediate '99 curriculum has a minimum of 204 hours for didactic and laboratory with some of the programs in the state running 300+ hours for their programs (232- 256 hours in the non-college system. It was noted that as the technologies change and they are added to the programs (12 lead) the didactic/lab hours keep adding up. It is impossible to complete the Intermediate '99 program in 204 hours now. It was suggested to review the sub-topic sheets for both the Intermediate and Paramedic programs to determine if an average could be determined.</p> <p>The Office requested that feedback be sent to the Office on any sections that the various programs felt could be accomplished in an on-line format. Please send your suggestions to Tom Nevetral for compilation.</p>	
<b>Competency Discussion</b>	Members of the committee discussed the possibility of awarding the experienced Intermediate student (one who may have extensive field experience or the CT with extensive field experience) credit for their competencies, based on their "previous experience". Committee members felt that this should be allowed over the new Intermediate student who has no ALS field experience after completing EMT-Basic. More discussion on this issue will follow at the next meeting.
